Objective

Innovative software engineer with a strong foundation in programming and problem-solving. Proficient multiple programming languages and development tools. Experienced in full-stack web development technology using MERN stack. Proven ability to design and implement scalable, efficient, and maintainable software solutions. Passionate about staying up-to-date with emerging technologies and collaborating with cross-functional teams to deliver cutting-edge products.

Education

Bachelor of technology (H) Computer Science and engineering

Global Institute of Technology and Management (8.0 CGPA), Maharshi Dayanand University, Rohtak Haryana Expected Graduation Date: July, 2024

Skills

Programming Languages: C++, Python

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js, API

Database Management: MongoDB, MySQL Tools & Technologies: Git, Git Hub, VS code

Behavioral Skills: Communication, Adaptability, Team Collaboration, Problem-Solving, Time Management Interpersonal Skills, Strong presentation and interpersonal skills, Ability to present ideas in user-friendly manner.

Projects

Learning Management System (LMS) | August 2023 - Present | Sole Developer

- Designed and implemented a comprehensive Learning Management System using MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Developed user authentication and authorization features, ensuring secure access to learning resources
- Implemented data analytics tools to assess user interaction and optimize content delivery.
- Troubleshooting of hardware and Software Errors.
- Implemented a real-time dashboard to monitor user engagement and course analytics.
- Collaborated with a cross-functional team to gather requirements, prioritize features, and ensure alignment with educational goals.

Review Flipkart Web Scrap Project | March 2023 - Present | Sole Developer

- Independently designed, developed, and deployed a web scraper to extract and analyze customer reviews from Flipkart using Python and Beautiful Soup.
- Implemented features to gather sentiment analysis and key insights from reviews.
- Developed a user-friendly interface for easy interaction and data visualization.
- Utilized data visualization tools to present trends and patterns in customer feedback.
- Achievements: Streamlined the process of gathering and analyzing product reviews, contributing to market research and decision-making for product improvement.
